- Large Commercial Solar Brokering
- Commercial LED Lighting Upgrades / Utility Rebate Programs
- Residential Lighting Upgrades: *free service with solar installation*

PROJECT SOLAR BEAR

Go Solar LED is committed to making an impact.

With your Residential Solar Installation, you immediately begin reducing your household's carbon footprint and its effect on Global Warming. By doing so, you will have already taken a step toward slowing the melting of the polar icecaps.

Additionally, Go Solar LED will symbolically adopt a polar bear in your family's name. Proceeds from your "Solar Bear" adoption will be donated to World Wildlife Fund, the world's leading wildlife conservation organization.

Ask Our Customers

- *"Bob came to my house and resolved an issue with my six year old Solar array. I recommend Go Solar LED 100 percent!" -Rich Clark owns a 4.0 KW Solar PV array in Niagara Falls, NY*
- *"Working with Go Solar LED was a great experience. The owner listened to all of my concerns and needs I was looking for when going solar power. We had a great installation and the panels are working just as planned. I recommend Go Solar LED to anyone that is thinking about going that route." -Aleksy Shekochikhin owns a 6.03 KW Solar PV array in Williamsville, NY*
